## About BLE

We design, engineer, and deliver high-quality, compliant, and innovative lighting and back-up power systems for commercial, industrial, and public sector environments.

## Our Mission

At BLE Lighting & Power Ltd, we are committed to delivering high-performance emergency lighting and power solutions that safeguard lives and properties. Through British manufacturing, smart technologies, and expert support, we help businesses maintain compliance, reduce risks, and enhance energy efficiency. Our mission is to provide innovative, reliable, and sustainable solutions tailored to the needs of our customers.

## Our Capabilities

- Emergency Lighting Solutions**

We manufacture and supply a comprehensive range of BS EN 60598-2-22:2021 compliant emergency lighting luminaires, including exit signs, bulkheads, twin spots, downlights, amenity lights, commercial lighting, and central battery slave luminaires. Designed for reliability, our products ensure critical emergency lighting is available when it's needed most.
- Back-Up Power Solutions**

We design, manufacture, and supply a comprehensive range of back-up power solutions, including static inverters, central battery systems, batteries, and accessories, to meet all back-up power requirements. Our portfolio also features the STAVELEY Compact Emergency Lighting Static Inverter, a unique solution that delivers 230V AC to power standard LED lighting at full output for three hours in emergency mode ensuring uninterrupted safety and compliance.
- Bespoke Solutions**

We provide tailored emergency lighting and power solutions designed to meet the unique requirements of each project. Our in-house technical and production teams have the expertise to design, adapt, and modify products to suit your specific needs, ensuring optimal performance and compliance.
- On-Site Services**

From initial site surveys and installation to battery build, commissioning, and ongoing maintenance, our team of highly trained engineers bring expertise and precision to every project.
- Automated Emergency Lighting Systems**

BLE automated emergency lighting systems are designed to provide reliable, compliant, and efficient monitoring and testing. Our systems help ensure that emergency lighting remains fully operational, reducing the need for manual testing. Our technology simplifies maintenance and provides real-time status updates.

# Why Choose BLE?

- **Made in Britain Range** - We offer a range of high-quality products designed and manufactured in the UK.
- **Industry Expertise** - We have over five decades of experience in emergency lighting and power solutions.
- **10 Year Warranty** - Our Made in Britain luminaires offer assurance of long-term reliability and performance.
- **BS EN 60598-2-22:2021 Compliant** - Our ranges adhere to the latest standards for safety & compliance.
- **Sustainable Innovation** - We are investing in greener lighting and packaging solutions including LiFePO4 batteries.

## Key Sectors We Serve

- Commercial & Offices
- Manufacturing & Warehousing
- Industrial & Factories
- NHS Trusts & Healthcare
- Transport & Infrastructure
- Retail & Hospitality
- Sport & Leisure
- Care Homes
- Education & Local Authorities

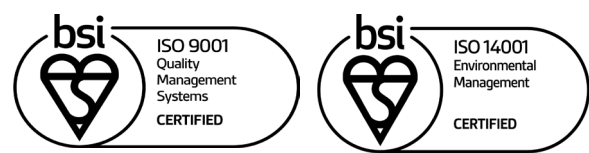

## Service & Maintenance

BLE offers comprehensive service and maintenance for back-up power systems, ensuring reliability, compliance, and peak performance. Our expert engineers offer planned preventative maintenance, emergency call-outs, and system health checks to minimise downtime and extend the lifespan of your equipment.

## Certifications

We are committed to delivering high-quality, sustainable, and compliant solutions. Our ISO certifications demonstrate our dedication.

## Compliance & Testing

Safety is our top priority, and emergency lighting is not just an optional feature - it is a critical life safety system. We support businesses in navigating emergency lighting regulations, selecting the right products, and maintaining compliant systems. Our extensive range is rigorously tested to the highest standards, ensuring reliability, compliance, and peace of mind.

## CPDs & Training

We offers comprehensive CPD sessions and product training, designed to enhance industry knowledge and ensure best practices in emergency lighting and power systems. Our sales and technical teams provide expert led training on regulatory compliance, system design, installation, and maintenance, tailored to the needs of consultants, contractors, and facilities managers.
