Covered.***

BACK-UP POWER SERVICES

Please contact the BLE Sales Team to discuss your requirements.

FULL TURNKEY SOLUTION

With over 56 years of specialist experience, BLE offers fully integrated, turnkey solutions - from initial site survey through to design, manufacture, commissioning, and ongoing service and maintenance. Our in-house expertise spans every step, including custom battery builds, product development, and full WEEE compliance.

We work closely with clients to ensure systems are designed to meet the latest safety legislation and British Standards, giving complete peace of mind when it matters most. Whether it's a new build, retrofit or upgrade, BLE delivers robust, high-quality solutions tailored to the exact requirements of the project.

Our collaborative approach, technical capability and dedication to product quality set us apart - ensuring your emergency lighting performs when it's needed, and remains compliant throughout its life.

Countless sectors rely on BLE for dependable emergency lighting and back-up power solutions. Our extensive experience covers a wide range of industries, including:

- Commercial & Offices
- Manufacturing & Warehousing
- Industrial & Factories
- NHS Trusts & Healthcare
- Transport & Infrastructure
- Retail & Hospitality
- Sports and Leisure
- Care Homes
- Education
- Local Authorities

Our adaptable product line-up caters to the unique requirements of each customer and project.
